Specification Amendments

Please replace the Abstract with the following re-written abstract:

Within ~~both~~ a method for operating optimally utilizing a multi-chamber fabrication tool ~~and a system for operating the multi-chamber fabrication tool~~, there is first provided a multi-chamber fabrication tool comprising a series of chambers[[.]] wherein [[T]] there first is also defined for each chamber within the series of chambers prior to processing substrates within the series of chambers a minimum of one fabrication process to provide a series of fabrication processes corresponding with the series of chambers, wherein at least one fabrication process may be undertaken within more than one chamber and at least one chamber has defined therein more than one fabrication process including the at least one fabrication process which may be undertaken within more than one chamber. wherein at least one chamber is then selected prior to processing a substrate for carrying out the at least one fabrication process on the substrate within more than one

Serial No.: 09/818,313

~~chamber. There is also processed within the multi-chamber~~
~~fabrication tool a substrate while employing the at least one~~
~~fabrication process which may be undertaken within more than one~~
~~chamber, wherein a chamber within which is processed the~~
~~substrate while employing the at least one fabrication process~~
~~which may be undertaken within more than one chamber is selected~~
such as to optimize utilization of the multi-chamber fabrication
tool.
